SUMMARY

Senior Software Engineer with 8+ years delivering robust **B2B SaaS, fintech** and **healthcare** solutions through close client collaboration and high-quality engineering practices.

SKILLS

- Javascript • Typescript • Nodejs • Python • Golang • LLM
- Express.js • NestJS • Flask (python framework) • FastAPI • Angular 20+ • NgRx
- MySQL • PostgreSQL • DynamoDB
- Anthropic Claude • Gemini • OpenAI Gpt-4o
- RPC | gRPC • REST
- Docker • Kubernetes • Kafka • Github Actions

AI-AUGMENTED ENGINEERING & COMPLIANCE

- **Primary LLMs:** Anthropic Claude (Professional Tier), OpenAI GPT-4o and Gemini
- **Integration:** Integrated **Claude** into daily workflows for complex architectural refactoring, debugging distributed systems, and generating HIPAA-compliant documentation.
- **Coding Assistants:** GitHub Copilot and **Claude** for real-time boilerplate and unit test generation.

EXPERIENCE

Senior Software Engineering Consultant

The Idea Compiler *May 2025 - Present*

(Python | Flask | gRPC | Postgresql | Kubernetes | Anthropic Claude/OpenAI Gpt-4o)

- Worked as a core member of the team developing a healthcare transaction processing system based on **EDI files compliant** with the **005010 X217 standard**. Collaborated directly with the client and their engineering team, performed code reviews, and managed deployments across multiple environments.
- Subsequently joined the team working on the **X215 standard** implementation, focusing on accelerating feature readiness for testing. Improved and refactored code developed in parallel by other team members, resolved defects, and maintained direct communication with the client and their team to ensure alignment and timely delivery.

Software Engineering Consultant

ONYX IQ *Nov 2023 - May 2025*

(Angular | Golang | Mysql)

- Implemented a robust data caching layer that reduced server calls and decreased overall server load.
- Optimized existing **Golang** and **Angular** codebase, improving endpoint response times, improving error handling end-to-end and tightening up features known and unknown flaws.

Full Stack Developer

Igd Solutions Corp, Belgrade *May 2021 - Oct 2023*

(Angular | Nodejs | Express.js | Typescript | DynamoDB)

- Modernized legacy codebase by refactoring core modules into **TypeScript**, resulting reduction in runtime errors and improved maintainability.
- Streamlined cross-service communication through strategic microservice integration, enhancing system modularity and uptime.

Backend Developer

Ivs Freight, USA *Jun 2020 - Mar 2021*

(.NET | Angular | MySQL)

- Maintained .NET server-side infrastructure and executed code reviews, ensuring zero downtime during production releases

Full Stack Developer

E-hoi GmbH, Frankfurt am Main *Feb 2020 - May 2020*

(Java | ColdFusion | Angular | MySQL)

- Delivered full-stack **Java** and **Angular** solutions, resulting in concise, fast and user friendly customer onboarding process

Full Stack Developer

Data Security d.o.o, Niš *Dec 2018 - Jun 2019*

(PHP | Laravel | MySQL)

- Developed **PHP (Laravel)** custom **CRM** system

Web Developer

VTŠ Apps Team, Niš *Nov 2016 - Jul 2019*

(PHP | Laravel | MySQL)

- Trained and mentored 8 new team members in **PHP** and **Laravel** development
